I, Melvin, must admit that my skepticism at first was pretty high and to begin rebuilding my credit was easy to succumb to. Before I connected with Ask 4 Premier Credit Repair Program my credit needed repairing. The program with Ask 4 Premier Credit Repair is an effective program that did alot to improve my credit. There was the expense of paying for the program, opening up my life (credit wise) to a stranger, dealing with letters, making calls, etc... I tell you that it was all worth it in the end. I received several letters and reports from creditors and the bureaus which I then promptly forwarded to Alicia Kahn my as instructed. Alicia made every effort to keep me updated on the work that she was doing, she emailed me whenever we communicated to let me know what we talked about, that I can view the work that she had completed these are the type of people you want to work with. Alicia is a go getter and I really appreciate that about her. The cost was minimal every month and I have far surpassed the cost in all the savings; I have gained through other benefits of having an improved credit score. This program have given me the ability to restore my credit again and start over. I really appreciate the help and would recommend the service to anyone that's willing to restore their credit.
